Public comment from Burt Wilson on the 5th Draft of the Delta Plan:

Under the auspices of the California Environmental Quality Act, the Delta plan certainly has raised the craft of "piecemealing" to an exquisite fine art. Whether the BDCP plans are included the the Delta Plan or not, The Delta Plan is guilty of piecemealing and should therefore be withdrawn and a new plan, including all elements of the project, be devised.

By piecemealing the Delta Plan, the DSC can put forward EIR's that are incomplete and thus publicly deceptive as the present a plan in pieces unless the BDCP plan is included in its final draft proposal.
